

The Northeastern Section of the Geological Society offers grants to support individual research by sophomore or junior undergraduates attending universities within geographic [boundaries](#) of the Northeastern Section. Students should have the objective of presenting the results of their research at a Northeastern Section or Annual GSA meeting. Funding generally does not exceed ~\$1,000 per proposal.

Students and applications must meet the following criteria:

- The student must be enrolled at an institution within the Northeastern Section ([see boundaries](#)).
- The student must be a student member of GSA.
- If more than one application is submitted from one department, the Chair of the department must rank the proposals.
- Funds may not be used for salaries and stipends and funding may be requested for only one year at a time. Students may submit proposals in two consecutive years, even if funded previously.
- **Proposals must be received via e-mail no later than 25 February 2011.**
- Students will be notified following the Northeastern Section Meeting in Pittsburgh.
- Funded students are expected to expend the funds as stated in the proposal; return any unexpended funds to the Section Secretary; and submit a written report of the research and disposition of funds to the Section Secretary within three months of completion of the project.

The proposal should follow this sequence

1. Application cover sheet
2. Proposal narrative. This will include purpose, significance and methods used. Recommended length of the narrative is 1-2 pages)
3. Itemized budget. Please include all potential sources of funds, including prior or pending funding.
4. Letter of endorsement from project supervisor

Deadline for all proposals is **25 February 2011**.

Proposals and questions should be directed to:

**Stephen G. Pollock**, Secretary/Treasurer
