

Index of Authors

How to use the indexing system:

The first number (preceding the dash) represents the session number in which the paper will be presented.

The second number (following the dash) indicates the presentation order of the paper within its session.

Example: Ahmed, Israt J. 59-4*

Find Session #59 in either the Abstracts volume or the Technical Session portion of the Program, and look at the fourth paper in the session.

Page numbers are not listed in this index. Refer to session number and order of presentation to locate the author you are searching for.

INTRODUCING THE AGU CAREER CENTER

POST. INTERVIEW. HIRE. IT'S REALLY THAT SIMPLE...

Many job seekers and employers are discovering the advantages of searching online for industry jobs and for qualified candidates to fill them. But when it comes to finding scientific professionals, the mass market approach of the mega job boards may not be the best way to find what you're looking for. The American Geophysical Union (AGU) has created the AGU Career Center to give employers and job-seeking professionals a better way to find one another and make that perfect career fit.

EMPLOYERS: Target your recruiting to reach qualified professionals quickly and easily. Search the resume database to contact candidates, and get automatic e-mail notification whenever a candidate matches your criteria.

- + Search a database of highly qualified resumes
- + Set the skills criteria and let the resumes come to you
- + Complete an Employer Profile—promote your company's culture, benefits, and why it's a great place to work
- + Save and manage applicants and resumes

JOB SEEKERS: Get your resume noticed by the people in your field who matter most. Whether you're looking for a new job, or ready to take the next step in your career, we'll help you find the opportunity that you've been looking for.

- + Set up email notifications when jobs meeting user-defined criteria get posted
- + Search and browse all jobs using many different criteria (location, job category, title)
- + Upload resumes and keep it 'on file' to instantly transfer to employers

Visit careers.agu.org today to post your job or search job listings.

Stable & Cosmogenic Isotope science

Isotopes are the key to knowledge about our past, present and our future. Our isotope analysis services can help you unlock the answers to ecological, geological and environmental history.

We provide carbon, nitrogen, sulphur, oxygen and hydrogen stable isotope analysis, ^{10}Be , ^{26}Al , ^{137}Cs and ^{210}Pb dating, and offer **discounts** for volume submissions. Our analysis is backed by world-leading scientists whose research spans climate, environmental protection and sustainability, geology, and hydrocarbons, and is supported by expert technicians.

unlock a moment in time

Radiocarbon dating services

When you seek knowledge of “a moment in time” Rafter Radiocarbon can provide the answers. We offer world-leading research scientists whose research spans climate, environmental protection and sustainability, archaeology, and geology, supported by expert technicians. We have worked with clients world-wide for over 50 years and we are a regular participant in the International Radiocarbon Intercomparisons.

Contact us for a **FREE** consultation on applicability and sampling.

Laboratory Manual for Introductory Geology

First Edition

ALLAN LUDMAN, *Queens College, CUNY*
STEPHEN MARSHAK, *University of Illinois*

The first new lab manual for introductory geology in a generation.

"I like the conversational style, which leads from the necessary information to the exercises. Much of the difficulty in interesting students at the intro level is holding their attention long enough to get to the compelling parts of the course."

—RAY RUSSO, *University of Florida*

The Mountains of Saint Francis

THE GEOLOGIC EVENTS THAT SHAPED OUR EARTH

WALTER ALVAREZ

In *The Mountains of Saint Francis*, Walter Alvarez tells the saga of how geologists learned remarkable lessons about Earth from central Italy. Based on 40 years of research experience, this book recounts not only the geologic discoveries, but also the stories of the scientists who made the discoveries, setting it all in an account of the pleasures of doing geologic research in a lovely and historical land. Profusely illustrated and written in a nontechnical way that does not skimp on the science, *The Mountains of Saint Francis* is a book for geologists, their students, and their friends.

Over 350 universities and colleges in North America use one of the two introductory texts by Stephen Marshak!
