FIGURE CAPTIONS FOR DATA REPOSITORY

Figure A. Pore-water and authigenic-carbonate oxygen isotope data from ODP Sites located in the Peru (Sites 685, 688), Nankai (Site 808), and Barbados (Site 674) accretionary wedges. Superscripts \( f \) and \( c \) denote pore fluids and authigenic carbonates, respectively. Values reported relative to SMOW for fluids, PDB for carbonates. (Data from Gieskes et al., 1990; Kastner and Elderfield, 1993; Kastner et al., 1990, 1993; Thornburg and Suess, 1990; Vrolijk et al., 1990; Vrolijk and Shephard, 1991.)

Figure B. Pore-water and authigenic-carbonate oxygen isotope data from the Cascadia accretionary wedge, ODP Sites 891 and 892. See Figure A for further explanation. Data from (Kastner et al., 1995; Sample and Kopf, 1995).
