GSA Data Repository item 0000. Carbon and oxygen stable isotopic values of planktonic foraminiferal species across the K-T boundary (0 cm) at Caravaca, Spain. The number of specimens analyzed in each sample is shown above (n≤9) and beside (n≥10) each closed circle. Stable isotopic values of fine fraction carbonate and a benthic foraminiferal species, *Lenticulina* spp., are also shown. The overall uncertainties of δ^{18}O values are within 0.06‰.
GSA Data Repository item 0000, Oxygen stable isotopic values of planktonic foraminiferal species across the K-T boundary (0 cm) at Caravaca, Spain. Stable isotopic values of fine fraction carbonate and a benthic foraminiferal species, *Lenticulina* spp., are also shown. The overall uncertainties of δ¹⁸O values are within 0.06‰.
