Aeromagnetic contours (dark blue lines) from North American Magnetic Map (2002) grid reprojected to Transverse Mercator Projection, base latitude of 0°, central meridian of -114°W. 1 km grid. Note mismatches as much as 2 km in registration between the geologic map and the aeromagnetic data. The registration errors may be due to the age of the base map used in Gastil et al. (1975). Contour intervals 50 and 200 nT.

Geological Society of America Memoir 211
Peninsular Ranges Batholith, Baja California and Southern California
Edited by Douglas M. Morton and Fred K. Miller
