Figure DR-1. Spider diagram for mafic volcanic rocks from the Channel Islands located off the coast of southern California (Weigand et al. 1998).

Figure DR-2. Spider diagram for averages of Neogene felsic volcanic rocks from coastal California based on data from Cole et al. (1995, Weigand et al. 1998), and Weigand et al. (2002). An average pattern for felsic volcanic rocks from southern California (Weigand et al., 1998) and an average pattern for Pinal metasedimentary rocks are also plotted (De Melas, 1983; Copeland, 1986).

Figure DR-3. Spider diagram comparing average pattern for felsic meta-volcanic rocks from the Pinal terrane with average pattern for felsic rocks from the Alaskan terrane (Barker et al., 1992). An average pattern for Pinal metasedimentary rocks is also plotted (De Melas, 1983; Copeland, 1986).
Normalized to Primitive Mantle

Meijer, Figure DR-3, .xcl
