

GSA Graduate Student Research Grant Program - Subject Matter Categories

When applying for a GSA Graduate Student Research Grant, students may select one of the following categories as the primary subject matter addressed in their research proposal. Many proposals will cover more than one subject area, but students should select the subject that is most prominent in their proposed research. GSA welcomes proposals in any of these categories, as well as others not listed here. If a student's primary subject matter is not included in this list, they may select "Other". GSA aims to support a wide variety of research topics; there is no preference for specific subject matter.

Archaeological Geology	Medical Geology
Biogeosciences	Mineralogy/Petrology
Climatology/Meteorology	Oceanography/Marine Geology
Coal Geology	Organic Geochemistry
Economic Geology	Paleobotany
Engineering Geology	Paleoecology
Environmental Science	Paleoclimatology/Paleoceanography
Geography	Paleogeography
Geophysics/Tectonophysics	Paleontology
Geoscience Education	Petroleum Geology
Geothermal	Planetary/Space Science
High Temperature Geochemistry	Policy/Regulatory
History of Geology	Quaternary Geology/Geomorphology
Hydrogeology/Hydrology	Seismology
Karst	Soil Science
Limnogeology	Stratigraphy/Sedimentology
Low Temperature Geochemistry	Structural Geology/Tectonics
Mapping	Volcanology
	Other
