CATCHING FIRE

The Growing Onslaught of Wildfires and Post-Fire Landslides in the U.S.

Wildfires and landslides impact every state and territory in the U.S.— taking thousands of lives and costing the nation billions of dollars, each year.

This virtual briefing will highlight the contributing factors and drivers of these hazards and what science is telling us about the future outlook of these hazards. The briefing will also explore the need for science-informed policies and strategies necessary to adapt to current and future wildfire and landslide hazard scenarios.

SPONSORS

Senator Lisa Murkowski

Senator Maria Cantwell

Representative Suzan DelBene

Representative Don Young
