Upper Centennial Flat Quadrangle

Geologic Map of the Upper Centennial Flat 7.5' Quadrangle; Inyo County, California

Compilation by Richard S. Whitworth 1987

Scale 1:24,000

Contour Interval 20 Feet

Geographic North

UTM Grid North

July 1988

INYO COUNTY, CALIFORNIA

Reference maps with 7.5 minute quadrangle boundaries. Faults are delineated.

Note: Boundaries of mapped quadrangles coincide with UTM zones. Title and scale information conforms to those of UTM maps. Geologic boundaries are arbitrary and do not depict true contacts or systems. Field work was conducted under the direction of Richard S. Whitworth, a geologist of the U.S. Geological Survey, and the geologic maps shown represent the completed interpretation. The geologic map base is the National 7.5 minute quadrangle series, which is a compilation of published maps of U.S. Geological Survey. Topographic lines are on the boundary of the quadrangle.
